

PS&S and 3D Global Solutions Announce Launch of New Company: PS&S Global, LLC

Firm Will Provide Energy Procurement, Alternative and Renewable Energy Development and Management, Site Remediation, and Modular Building Services

WARREN, NJ, (March 15, 2011) – PS&S, LLC, the highly acclaimed design and engineering firm, is joining with 3D Global Solutions Inc., a management consulting firm, to launch a new company, PS&S Global, LLC, a certified Service Disabled Veteran Owned Small Business (SDVOSB) that provides clientele with comprehensive project development and management services for projects involving energy procurement, alternative and renewable energy and energy efficiency, environmental remediation, and modular buildings.

Many agencies of the Federal government, at least 30 states, and many private sector industries have established set-aside programs for SDVOSB's, which are firms that are at least 51% owned by qualified service-disabled veterans. Michael Dodd, CEO of PS&S Global, LLC, leads the firm. Dodd spent 11 years as an officer in the Marine Corps and was injured in the line of duty. He also has extensive experience in the private sector, having served in progressively more challenging leadership positions for private sector firms. Since 2004 he has served as CEO of 3D Global Solutions, LLC which provides an array of infrastructure, technical services and human capital management services to a wide array of public and private sector clients.

The firm also benefits from the leadership of Frank Libutti as Strategic Advisor. Libutti is a highly decorated retired United States Marine Corps Lieutenant General who retired after 35 years of distinguished service. Libutti also serves as President and COO of 3D Global Solutions.

In announcing the launch of PS&S Global, LLC Dodd said: “We see PS&S Global as perfectly positioned to succeed in the marketplace. Since 2006, when the federal government first created the SDVOSB program, there have been few, if any, development and management firms that can handle the type, size and complexity of projects that government agencies, most especially the Departments of Energy and Defense, Veterans Administration and others, typically need to manage. Leveraging the significant expertise of 3D Global Solutions and PS&S, PS&S Global has the expertise, capabilities and capacity to handle a wide array of projects for government and private sector clients.”

John A. Sartor, President and COO, shares a similar vision for PS&S Global, LLC: “PSS Global is built on a strong foundation of ethical, reliable, value-added project delivery. The breadth of our management team's capabilities, combine with their successful track records, will quickly launch PSS Global as a leader in the Federal, State and Private Sectors.”

Key players in PS&S Global, LLC include Robert J. Fani, Former President, COO, and Member of the Board of a Fortune 500 Energy Company who will serve as a Board Member, and Dr. Anthony J. Sartor, Chairman and CEO of PS&S, LLC, and former President and COO of a major energy services company, who will also serve as a Board Member.

PS&S and 3D Global Solutions Launches New Joint Venture: PS&S Global, LLC

PS&S Global's expertise is focused in four critical areas: energy procurement, alternative and renewable energy and energy efficiency development and management, site remediation and modular buildings. In the energy space, the firm manages the design, construction, and maintenance of small- to mid-size energy facilities that utilize a wide range of renewable energy sources, including solar/photovoltaic farms, wind farms, tidal power, geothermal power and fuel cells. PS&S Global offers innovative, cost-effective solutions to post-industrial sites needing significant cleanup with a goal of quickly restoring properties to productive use. The company manages all aspects of restoration projects from start to finish, conducting site investigation, remediation design, remedial construction and close-out. Finally, the firm has the capacity to procure, develop and manage projects involving modular buildings, such as barracks, dormitories, and equipment shelters.
